

RED SEAL ELECTRIC COMPANY

One Complete Source for Thermal, Electrical, & Mechanical Insulation

DuPont™ Nomex®

Nomex® is a synthetic aromatic polyamide polymer that offers high levels of electrical, chemical and mechanical integrity when converted into its various sheet forms. Used properly, Nomex® products can help extend the life of electrical equipment and reduce premature failures and repairs.

Nomex® Papers

Type 410 - High inherent dielectric strength; thermal stability; chemical stability (compatible with virtually all classes of varnishes & adhesives).

Type 411 - Fair absorbency to varnishes & resins.

Type 414 - Similar electrical & thermal properties to Nomex® 410, more flexible & conformable; impregnable.

Flexible Nomex® insulation. Available in slit Rolls (*see above*) and also Sheet form (*left*) ranging in thicknesses from 2 mil to 30 mil.

Grades 410/411/414.

Red Seal maintains an extensive inventory and can typically ship within 1-2 business days when required.

Red Seal is proud to be an authorized Distributor-Fabricator of Dupont™ Nomex® .
